

Ductless Fume Hood, FMH-800DL

Description

Ductless fume hood is a ventilation device used in laboratory and industrial environments, providing a safe and efficient air filtration and exhaust system to protect operators and the environment from harmful gases and particles. Its main feature is that it does not require the installation of a duct system, allowing for flexible placement in any desired location. It utilizes chemical/HEPA filters and a fan system to effectively filter and remove harmful substances from the air, including toxic gases, chemicals, microorganisms, and particles.

Advantage

- Powerful filtration system can be configured with HEPA filters and chemical filters according to customer requirements, effectively filtering and removing harmful substances to ensure a safe operating environment and protect personnel from harm.
- Easy to operate, equipped with a 7-inch LCD color touchscreen, it displays real-time parameters such as air velocity, VOC concentration, temperature and humidity, and filter lifetime. This achieves excellent human-machine interaction.
- Humanized design, three-sided acrylic transparent material observation window, convenient for multi-angle observation.
- Low noise design, using high-quality DC centrifugal blower to ensure performance while providing users with a quiet working environment.

Specifications

Model	FMH-800DL
External size (WxDxH) (mm)	800x620x1850mm (2PC filter)
Operation area size (WxDxH) (mm)	780x540x775mm
Operation surface Height	690mm
Max. opening	650mm
Range of Air-velocity	0.4-0.6m/s
Power consumption	60W
Screen	7-inch color touch screen
Blower	DC Centrifugal blower, Adjustable speed
Front window	Manual acrylic window
Chemical filter	2 pcs
Standard	LED lamp, Base stand,
Optional	UV lamp, HEPA filter, Cabinet base stand, Water tap, Gas tap

Fume Hood

Description

FMH series ductless fume hood is a kind of negative pressure ventilation system for protecting operator and laboratory, utilizes carbon filtration to protect laboratory personnel from toxic chemical fumes, odors, and particles. Known for its plug-and-play feature and mobility, ductless fume hood guarantees a hassle-free installation and no lab work interruption.

Humanized Features

- Ergonomic Control Panel Location, centered and angled down for an easy reach & viewing.
- Made of solid psychological board, resistant to strong acid and alkali
- The non-direct light source design can effectively relieve the operator's visual fatigue under the condition of ensuring the illumination
- Intuitive and easy-to-use microprocessor controller with LCD display, graphical and digital display of the operating status of each function, such as filter life, UV life etc.

Convenience Features

- Memory function in case of power-failure.
- Filter and UV life indicators facilitate a timely replacement plan.
- Two side glass windows installed for easy experiment observation.
- Equipped with temperature sensor to show the real temperature during operation.
- Waterproof socket provide convenience for small instruments to be used in the operating area.

Safety Features

- Front sliding sash interlock with fan and UV lamp.
- UV sterilization with UV lamp timing function.
- Front sash and side windows are made of UV-resistant tempered glass.
- The host and sockets have independent capacitors to prevent current overload.
- Memory function in case of power-failure.

Ducted Fume Hood

Description

FMH (A) series Fume Hood is designed as a negative pressure ventilation system that ensures the safety of operators and the laboratory environment. It works by drawing room air inward through the front opening of the hood and continuously ventilating it with an extraction blower. This prevents the spread of contaminated fumes, vapors, toxic gases, aerosols, and corrosive substances that may be generated during experiments. Furthermore, an optional active carbon filter can purify the polluted air before it is exhausted through the duct, thereby protecting the outdoor environment as well.

Humanized Features

- 1. UV lamp for sterilization.
- 2. Resistant to weak acid and alkali.
- 3. Adjustable air speed: 9 levels
- 4. Motorized front window, height adjustable.
- 5. Microprocessor control system, LED display.
- 6. With memory function in case of power-failure.

Advantage

- Microprocessor control system, LED Display.
- HEPA filter with efficiency: 99.995% at 0.3um.
- Manual front window is 5mm toughened glass, anti-oxidation.
- Air speed adjustable.
- Desktop type, with a handle, saving space and easy to move.
- Desktop type, with a handle, saving space and easy to move.
- Pre-filter is polyester fiber, washable and anti-ultraviolet radiation.

- Automatic cutting off UV lamp function by opening glass.

- FMH-500II have color screen LCD controller (with sterilization timing, built-in socket controllable switch , front window status display, can set three position interlock , cumulative work timing, remote control.

Specifications

Model	FMH-500 FMH-500II
Applicable Scope	Protect operator and environment
Airflow Direction	Vertical
Cleanliness	Class 100
High Efficiency Filter	0.3um partical ≥ 99.999%
Colony count	≤0.5pcs/vessel (petri dish is φ 90mm)
Wind Speed	>0.5 (m/s)
Air Velocity Range	0.2-0.6 (m/s)
Noise Level	≤62db
Vibration Semi-peak Value	≤3um
Work Surface Bearing	10kg
Inner Chamber	SUS304 Stainless steel plate
Outer Shell	Cold rolling steel electrostatic spraying exterior
Operation Door	Tempered Glass
Max Door Opening	310mm
Pre-Filter	Polyurethane
LED Lamp	8Wx1
UV Lamp	8Wx1
Top Fan	90W one piece
Display	LED (Model II: LCD color screen)
Air Velocity Control	Intelligent multi-level adjustable
Additional Function	One key to open and close lighting sterilization
